A group working for better health

29 June 2022

To whom it may concern

I am writing in full support of the 'Sheerness Revival' Levelling-Up Fund bid being submitted by Swale Borough Council.

Sheppey Matters is a long-established charity on the Island, working with individuals who are most affected by the deprivation issues which have afforded Swale its priority levelling-up status. We whole-heartedly recognise the potential that substantial improvements to the built estate would bring in support of our current clients and future beneficiaries.

Our existing premises are ageing and fragmented. A successful bid will revitalise our offer, with fit for purpose rooms optimising the services we can provide. Fuller co-location with the GP practice will boost awareness of our services among new clientele and support the integration of formal and informal health support.

We are proud to be a key stakeholder in the bid and look forward to working closely with Swale Borough Council in the event of a positive government announcement in the autumn.

Yours faithfully

Michael Brown
Chair of Board of Trustees
Sheppey Matters
